

Father Tamany's

ALMANAC,

For the Year 1797.

Being the FIRST after LEAP-YEAR.

CONTAINING,

(Besides every Thing necessary in an Almanac),
A Variety of Pieces in Prose and Verse.

32

PHILADELPHIA:

Printed for W. YOUNG, MILLS, & SON, Booksellers,
No. 50, Second-street, corner Chestnut-street,

A Hymn on the Seasons.

These, as they change, Almighty Father ! these
Are but the varied God. The rolling year
Is full of Thee. Forth in the pleasing Spring
Thy beauty walks, thy tenderness and love.
Wide flush the fields ; the softening air is balm ;
Echo the mountains round ; the forest smiles ;
And every sense, and every heart is joy.
Then comes thy glory in the Summer months,
With light and heat resplendent. Then thy sun
Shoots full perfection through the swelling year ;
And oft thy voice in dreadful thunder speaks ;
And oft at dawn, deep noon, or falling eve,
By brooks and groves in hollow whispering gales.
Thy bounty shines in Autumn unconfin'd,
And spreads a common feast for all that lives.
In Winter awful Thou ! with clouds and storms
Around Thee thrown ! tempest over tempest roll'd !
Majestic darkness ! on the whirlwind's wing,
Riding sublime, Thou bid'st the world adore,
And humblest Nature with thy northern blast.

R E T I R E M E N T.

I envy not the proud heir wealth,
Their equipage and state :
Give me but innocence and health,
I ask not to be great.
I in this sweet retirement find
A joy unknown to kings,
For sceptres to a virtuous mind
Seem vain and empty things.
Great Cincinnatus at his plough
With brighter lustre shone,
Than guilty Cæsar e'er could show,
Though seated on a throne.
Tumultuous days, and restless nights,
Ambition ever knows.
A stranger to the calm delights
Of study and repose.
Then free from envy, care, and strife,
Keep me, ye powers divine !
And pleas'd, when ye demand my life,
May I that life resign !

The Anatomy of Man's Body as governed by
the Twelve Constellations.

I. ♈ Aries. The Head and Face.

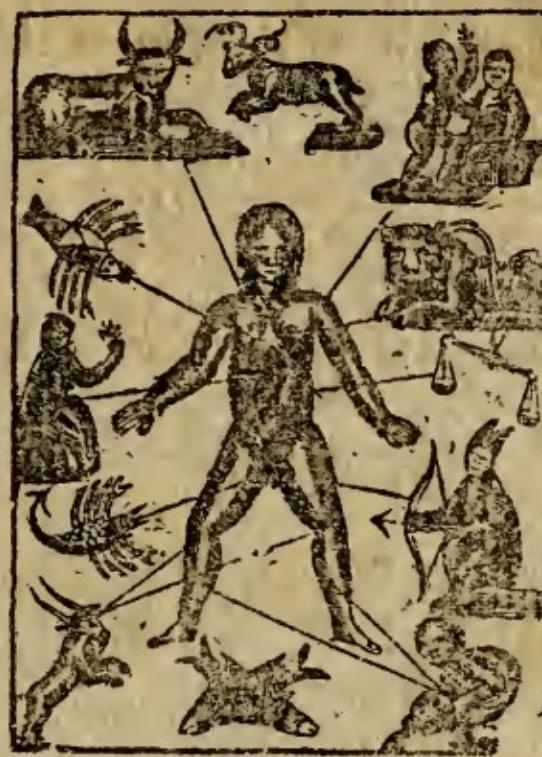

2. ♉ Taurus.
Neck.

4. ☊ Cancer.
Breast.

6. ♋ Virgo.
Bowels.

8. ♂ Scorpio.
Secrets.

10. ♑ Capricorn.
Knees.

XII. ♓ Pisces. Feet.

Explanation. If you want to know what sign you are under, first look for the day of the month in the almanac, and opposite to that in the sixth column, you have the sign that the moon is in; then finding the sign here, it shews the part of the body it is supposed to govern.

Characters and Names of the Planets,

○ Sun, ⊕ Georgium Sidus, ♁ Saturn, ♃ Jupiter,
♂ Mars, ♀ Venus, ♀ Mercury, ⊖ Earth, ○ Moon,
☊ Ascending Node, ☋ Descending Node.

Conjunction, ♀ Opposition, □ Quartile, * Sextile.

Vulgar Notes and Moveable Feasts.

Golden Number	12	Ash Wednesday,	March 1
Epact	3	Easter Sunday,	April 16
Solar Cycle	14	Whitsunday,	June 4
Dominical Let.	A	Advent Sunday,	Dec. 3
Roman Indiction	15		

ECLIPSES in the YEAR 1797.

1. Of the Moon, on the 9th of June, at 6h. 36m. A. M.
invisible.

2. Of the Sun, on the 24th of June, at 11h. 29m. A. M.
invisible.

3. A total eclipse of the Moon, on the 3d of December,
visible, as followeth : H. M.

Beginning of eclipse	9 50	Asterno
Beginning of total darkness	10 50	
Middle	11 38	
End of total darkness	0 27	Morning of the 4th.
End of the eclipse	1 27	

Digits eclipsed, about 21, from south side of the earth's shadow.

4. A small eclipse of the Sun, December 18, at 1h. 43m.
A. M. invisible.

R U L E to find the time of High-water for the following Places :

To the time of the moon's southing in the Calendar, add for	Cape May, Cape Henlopen, {	H.M. {
	Port Roseway, and Amboy, {	8 15 {
	Wilmington in Delaware State,	0 0
	New-York and Burlington,	9 0
	Capes Henry and Hatteras, - -	11 0
	Charleston light-h. & George town bar, {	7 0 {
	Cape Canso, and Sable Island,	8 30
	Hallifax, Cape Sable, & N. Providence,	8 0
	Boston, and Cape Ann light-house,	10 0
	Nantucket Shoals and Sandwich bay,	9 0
	Newbury-port and Williamsburg,	11 30 j

Note, If after the addition, the sum be greater than 12 h.
throw 12 hours away, and the remainder is the time of H.W.

Note, 1. THE calculations of this Almanac are made to solar or apparent time ; to which add or subtract the equation, for the mean or clock time.

2. The time of high water at Philadelphia is so computed as to serve for either morning or evening ; the morning flood being about 12m. earlier, and the evening flood 12m. later, than the time marked in the Almanac.

3. As the day ends at midnight, the rising, setting, and southing of the moon, when after that time, is found against the succeeding day. Thus, on the night of (or following the 21st of January, the moon rises at 1h. 31m. after midnight, that is, in the morning of the 22d, not at 1h. 31m. the time opposite the 21st day, which is that of its rising the preceding morning.

JANUARY, I Month, hath xxxi Days.

ADDRESS delivered at the Interment of Dr. RITTEN-HOUSE, late President of the Philosophical Society of this City, by the Rev. Dr. GREEN.

THIS is emphatically the tomb of genius and of science. Their child, their martyr, is here deposited, and their friends will make his eulogy in tears. I stand not here to pronounce it. The thought that ingrosses my mind is this—how much more clear and impressive must be the views which the late spiritual inhabitant of that lifeless corpse now possesses of God, of his infinite existence, of his adorable attributes—of that eternal blaze of glory which emanates from him, than when she was blinded by her veil of flesh. Accustomed as she was to penetrate far into the universe—far as corporeal or mental vision here can search, still, what new and extensive scenes of wonder have opened on her eyes, enlightened and invigorated by death! The discoveries of Rittenhouse since he died have already been more and greater than while he lived—Yes, and could he address us from the spiritual world, his language would be,

All, all on earth is shadow, all beyond
Is substance—the reverse is folly's creed.

He would doubtless admonish us to live for eternity and not for time. He would warn us to regard the whole period of this shadowy and passing state as a space of instruction, of discipline, of trial—of preparation for a state that is to follow: And he would charge us to use all our talents and endowments under the sensible influence of this impression, and to discharge the whole business of life with this view. This is a view truly great and elevated; truly and only worthy of an intellectual moral and immortal being. This is the view that unriddles human life; that gives meaning to all its seeming mysteries that explains the intention of all its toil, its afflictions, and its trials; that presents an object suited to those ceaseless graspings of the soul of which we are all conscious, but which no mortal ever did, or ever can fill with any possession of attainment on this side the grave. Say that a future world is to rectify the disorders, to supply the deficiencies, to compensate the labours, and to reward the sufferings of the present;—say, that the soul of virtue there shall drink to the full, shall expand her faculties and pursue her pleasures without hindrance, and shall find that “these light afflictions which are but for a moment, work out for her a far more exceeding

and eternal weight of glory," and you give design and dignity to the present state of man. He is seen to live for an end worthy of his powers, and worthy of all his efforts, and of all his distress.

Withdraw this view, and you see in him nothing but the enigma of creation. But, blessed be God, this view cannot be withdrawn from the believing mind—It is opened and rendered permanent by the sure word of revelation. This word assures us of a future existence. It assures the pardon of sin and eternal life, to him who relies, by faith on the infinite merits of the Redeemer. It teaches that through repentance and the renovation of our nature by the Spirit of grace, the human mind may be so purged from its moral defilement as to be admitted to the presence, and capacitated for the enjoyment, of uncreated purity.—That when thus atten-ped, it shall actually dwell with God for ever, eternally grow larger, in its conceptions of him, and of his various and inestimable excellence diffused through the immensity and diversity of his works. The same word instructs us that all the dispensations of providence towards us here, are means wisely calculated to produce in us the celestial temper, and to fit us for the transcendent felicity, we contemplate. Filled with these reflections, let us go from this tomb and resolve to regard the designation of our nature. Rightly regarding this, we shall fill up life with usefulness and duty, we shall bear its burdens with patience, and look forward to its close with pleasure. We shall consider death but as the birth of a new and nobler existence, as a dark but short passage to the regions of eternal day: and in the very agony of our change we may exclaim in triumph, "O death where is thy sting! O grave where is thy victory? Thanks be to God who giveth us the victory, through our Lord Jesus Christ."

AN E C D O T E.

When general Lincoln went to make peace with the Creek Indians, one of the chiefs asked him to sit down on a log. It was not long before he was desired to move, and in a few moments to proceed, and the request was repeated, till he found himself at the end of the log. The request was then renewed! to which he made answer, he could move no farther. "Just so it is with us," answered the tawney chief, "You have moved us back to the sea, and now ask us to go farther."

Of the Employment of Time, and of Indolence; particularly respecting the State. By Dr. FRANKLIN.

All that live must be subsisted. Subsistence costs something. He that is industrious produces, by his industry, something that is an equivalent, and pays for his subsistence: he is therefore no charge or burden to society. The indolent are an expense uncompensated.

There can be no doubt but all kinds of employment that can be followed without prejudice from interruptions; work that can be taken up, and laid down, often in a day, without damage; (such as spinning, knitting, weaving, &c.) are highly advantageous to a community; because, in them may be collected all the produce of those fragments of time, that occur in family-business, between the constant and necessary parts of it, that usually occupy females: as the time between rising and preparing for breakfast, between breakfast and preparing for dinner, &c. &c. The amount of all those fragments, is, in the course of a year, very considerable to a single family; to a state proportionably. Highly profitable therefore it is, in this case also, to follow that divine direction, ‘gather up the fragments that nothing be lost.’ Lost time is lost subsistence; it is therefore lost treasure.

Hereby in several families, many yards of linen have been produced from the employment of those fragments only, in one year, though such families were just the same in number as when not so employed.

It was an excellent saying of a certain Chinese Emperor, I will if possible, have no idleness in my dominions; for if there be one man idle, some other man must suffer cold or hunger. We take this Emperor’s meaning to be, that the labour due to the public by each individual, not being performed by the indolent, must naturally fall to the share of others, who must thereby suffer.

A N E C D O T E S.

HENRY the fourth of France, being informed that an edict which he had issued for the prohibition of luxury, was not enforced, published an explanatory proclamation, which ran thus, — “ Our order in prohibiting articles of luxury, particularly the use of lace and embroidery, only extends to the honest part of the community; for, as neither rogues nor women of bad character are worthy our notice, they have our

free permission either to obey or neglect the edict as they chuse." — This had the desired effect, every taylor and man-tua-maker in Paris being immediately set to work, to make such dresses as the edict ordered.

The late Jonas Hanway, was, in his person, of a remarkable thin habit, and in one of his walks in the neighbourhood of Park lane, he was met by a man much intebriated, who approached him in so irregular a direction, that it might have been concluded he had business on both sides of the way. Mr. Hanway stopped when he came up to him, to give him his choice which he would take; but the man stood as still as his intoxication would let him, without attempting to pass on either side. After viewing each other a moment, says Mr. Hanway, "My friend, you seem as if you had drunk rather too much;" to which the man replied, "You seem as if you had eat rather too little."

MAGNANIMITY of a CORSICAN ROBBER.

A Peasant, who in the most extreme indigence had become the leader of a gang of banditti, and been long famous for his exploits, was at length taken and committed to the care of a soldier, from whom he contrived to escape. The soldier was tried and condemned to die. At the place of execution a man coming up to the commanding officer said, "Sir I am a stranger to you, but you shall soon know who I am. I have heard that one of your soldiers is to die for having suffered a prisoner to escape: he was not at all to blame; besides the prisoner shall be restored to you. Behold him here,—I am the man. I cannot bear that an innocent man should be punished for me, and I come to die myself."—"No, (cried the French officer, who felt the sublimity of the action as he ought;) thou shalt not die, and the soldier shall be set at liberty. Endeavour to reap the fruits of thy generosity: thou deservest henceforth to be an honest man"

Extract of a LETTER from DR. FRANKLIN to DR. MATHER, of Boston.

The last time I saw your father was in the beginning of 1727. He received me in his library, and on taking leave, shewed me a shorter way out of the house, through a narrow

passage, which was crossed by a beam over head. We were still talking as I withdrew, he accompanying me behind, and I turned partly towards him; when he said hastily, stoop! stoop! I did not understand him, till I felt my head hit against the beam. He was a man that never missed an occasion of giving instruction, and upon this he said to me—you are young, and have all the world before you: stoop, as you go through it, and you will miss many hard thumps. This advice thus beaten into my head has often been of use to me through life, and I often think of it when I see pride mortified, and misfortunes brought upon people by carrying their head too high.

CURIOS QUESTIONS.

A curious man of high degree,

A garden would lay out,

When done, intending it should be

Elliptical about.

The size of it was if I'm right,

An acre's full content;

Its wall or fence when finished quite

In this proportion went—

So that the length unto the breadth

Should most exactly be,

(Nicely curious in the width)

As two is unto three.

Now this is all I do demand

Of any who eah tell,

What was the breadth of this same land,

And length also as well?

Three jealous Husbands with their Wives, being ready to pass by night over a river, do find at the water side a boat which can carry but two persons at once, and for want of a waterman, they are necessitated to row themselves over the river at several times: The question is, how these 6 persons shall pass by 2 and 2, so that none of the three wiyes may be found in the company of 1 or 2 men, unless their husbands be present?

EXTRACTS from ANCIENT RECORDS.

The following was the statute of New-Jersey restraining drunks:

"Concerning that beastly vice drunkeness, it is hereby enacted; that if any person be found drunk, he shall pay one shilling for the first offence, two shillings for the second and for the third time, and for every time after, two shillings and sixpence; and such as have nothing to pay, shall suffer corporal punishment, and for those that are unruly and disturbers of peace, they shall be put in the stocks until they are sober, or during the pleasure of the chief officer in the place where they are drunk."

Quere. Would not the enforcing of such a statute in modern times be a ready mode of raising a revenue and discharging our public debts?

Another law of New-Jersey was in these words;

"If any man shall abet himself, or run out of his province, with another man's wife, (without her husband's consent) and after return hither, he and she so offending, and being lawfully convicted thereof, shall each of them receive ten lashes upon their bare backs."

In the first code of laws in Massachusetts, we find the following wholesome provision made to restrain scolding:

"Whereas there is no express punishment, by any law hitherto established, affixed to the evil practice of scolding persons, by exorbitancy of the tongue, in railing and scolding;

"It is therefore ordered, that all such persons convicted before any court or magistrate, that hath proper cognizance of the case, shall be gagged, or set in a ducking stool and dipped over head and ears three times, in some convenient place of fresh or salt water, as the court or magistrate shall judge meet."

Quere. How far this law has curbed the exorbitancy of the tongue in New-England and whether a few modern husbands and wives would not be happier, if they were gagged or ducked?

Curious Account of the National Debt of England.

The present national debt commenced, and was near, 5,000,000*l.* in 1697; at the death of King William, in 1702*3*, it was 14,000,000*l.* at the death of Queen Anne, in 1717, it was 50,000,000*l.* reduced in 1717 to 46,603,100*l.* in 1727, the interest of it was reduced from 5 to 4 per cent. It was 64,593,797*l.* 16*s* 9*d*. in 1747; and was 74,780,886*l.* 8*s*. 2*d*. in 1757, when the interest was reduced to three per

Ent. It was £10,693,836/. 8s. 2*d.* in 1762; and was £27,497,619/. in 1772 when its interest amounted to £4,526,392/. per ann. In 1780, the debt was upwards of £90,000,000/. and in 1790, amounted to near £42 million, besides the unfunded debt of 30 millions, including the navy and exchequer bills, &c. This sum, at 4*d.* per ounce, will weigh about five millions pounds Troy weight. It would require 37,265 pounds weight, in ten pounds Bank Notes, having 512 notes to one pound. This sum in cash, if put into carts, each containing 1000lb. and have two horses to draw, allowing 40 feet to each cart, would load 5000 carts, and cover 37 miles in length, with a remainder of 16 carts in the 38 mile. Where it to be laid down in guineas, in a line, would extend above 4,300 miles in length; if laid down in shillings, would extend three and a half times round the globe; if in solid silver, would require 60,400 horses to draw it, at 15 cwt. for each horse.—Quere. Is there in the whole universe as much gold in circulation as would discharge this debt? If this is not sufficient, is there as much gold and silver in circulation as would be sufficient for the purpose?

T O A LADY who loved DANCING.

May I presume, in humble lays,

My dancing fair, thy steps to praise?

While this grand maxim I advance

That all the world is but a dance.

That human-kind, both man woman,

Do dance, is evident and common;

Folks who at court would keep their ground,

Must dance round the year attendance:

Whole nations dance; gay, skipping France

Has led the nation many a dance;

And some believe both France and Spain

Resolve to take us out again.

All nature is one ball, we find;

The water dances to the wind;

The sea itself, at night and noon,

Rises and capers to the moon;

The moon around the earth doth tread

A Cheshire round in buxom red;

The earth and planets round the sun,

Dance; nor will their dance be done

Till nature in one mass is blended

Then we may lay—the ball is ended.

PADY and the PUMKIN.

A Pady just landed in America, travelling up the country passed by where a farmer was gathering pumkins. ‘ And what do you call them things,’ says Pady. ‘ Mares eggs,’ answered the farmer. ‘ And won’t you sell me one of them, replies Pady; I wish to be in the way of raising my own horses; for my poor old father stretched the hemp for nothing at all but taking one without liberty.’ Yes, yes, said the farmer for a quarter dollar you may take one. Pady, pays the money, and receives his pumpkin. In descending a hill, he chanced to let the pumkin fall, and it rolled towards a bunch of bushes. It struck a stump and split open. A rabbit that lay under the bushes was startled, and ran off. Pady seeing the pumkin burst, and the rabbit run, thought the foal had come out of the egg, and he ran after it full speed, bawling out, ‘ Stop the colt! Stop the colt! Stop the colt!’

On a Kiss.

Humid seal of soft affection,
Tenderest pledge of future bliss,
Dearest tie of young connexion,
Love’s first snow-drop, Virgin kiss!

Speaking silence, dumb confession,
Passion’s birth, and infants play;
Dove like fondness, chaste concession,
Glowing dawn of brighter day.
Sorrowing joy, adieu’s last action
When ling’ring lips no more shall join;
What words can ever speak affection,
So lively and sincere as thine!

Leo, the Byzantine sophist, came to Athens to persuade the people to concord. Being a little fat personage, with a pot belly, he no sooner mounted the rostrum than a loud and universal laugh ensued. But he, nothing moved, taking advantage of the incident, said, “ Why do you laugh, men of Athens? My wife is yet fatter than me.” A louder laugh arose. But he proceeded, “ Now, fat as we are, and large, one bed easily holds us when at concord; but when variance arises, the whole house cannot contain us.”

COURTS OF LAW.

UNITED STATES.

Supreme courts are held,

AT the seat of the general government (at present in Philadelphia) on the first Mondays in February and August, annually.

Circuit courts are held,
